PROFESSIONAL SUMMARY

B.Tech Computer Science & Engineering (AI & ML) student with strong academic performance and hands-on exposure to Python, C, web development, SQL, data analysis and visualization. Experienced in building practical software projects and working with modern AI, GIS, weather and government data APIs to solve real-world problems.

TECHNICAL SKILLS

Programming: Python, C, HTML, CSS, JavaScript
Data Analysis: SQL, Pandas, NumPy
Data Visualization: Matplotlib
Database: MySQL
Tools & Platforms: Git, GitHub, LinkedIn

EDUCATION

B.Tech, Computer Science & Engineering (AI & ML) - Brainware University | SGPA: 8.60 2024-2028
12th (Senior Secondary Examination) - CBSE Board | Score: 82% 2024
10th (Secondary Examination) - CBSE Board | Score: 91% 2021

EXPERIENCE

Fresher

Open to internship and entry-level opportunities.

PROJECTS

SmartAgro - AI Advisory Intelligence

Tech Stack: Python, Flask, HTML5, CSS3, JavaScript, Groq API, Gemini API, Leaflet.js, Agmarknet API, OpenWeatherMap API, NASA MODIS NDVI Data, Chart.js, Hugging Face Spaces.

- Developed an AI-powered agriculture advisory platform for crop insights, weather-based recommendations and mandi intelligence.
- Integrated GIS/mapping, government market data, weather APIs and AI services to provide practical, location-aware information.
- Designed a responsive PWA interface with offline capabilities and data visualization.

EXPENSE TRACKER | GitHub · Live Demo

Tech Stack: Python, Flask, Flask-Login, SQLAlchemy, PostgreSQL (Supabase), HTML5, CSS3, JavaScript, Chart.js, Render.

- Built a full-stack personal finance app with multi-user authentication (Flask-Login, hashed passwords) so each user sees only their own data.
- Implemented full CRUD for expenses across 8 categories, with search by date/month/year and category filtering.
- Added interactive doughnut and bar charts with daily, monthly and yearly views; data stored in cloud PostgreSQL, deployed on Render.

STUDENT REGISTRATION SYSTEM & MANAGEMENT | GitHub · Live Demo

Tech Stack: Python, Flask, Flask-SQLAlchemy, PostgreSQL (Supabase), HTML5, CSS3, JavaScript, Jinja2, Unicorn, Render.

- Developed a role-based web platform with separate Student and Admin portals using secure session login and Werkzeug password hashing.
- Built admin dashboard with student stats and full CRUD, search and filters by branch/year; students can update profiles and print a digital ID card.
- Added server-side validation and duplicate checks (roll number, email); migrated to cloud PostgreSQL and deployed on Render.

HOSPITAL MANAGEMENT SYSTEM

Tech Stack: Python, MySQL, HTML, CSS, JavaScript.

- Developed a database-driven hospital management application for managing patient records, appointments and essential hospital information.
- Implemented structured database operations to efficiently store, retrieve and manage hospital data.

TIC-TAC-TOE MODERN | GitHub · Live Demo

Tech Stack: Python, Flask, HTML5, CSS3, JavaScript, Docker, Hugging Face Spaces.

- Built a responsive two-player web game with X/O symbol selection, live turn indicator and automatic win, loss and draw detection.
- Added a "Clear Wrong Input" undo feature; containerized with Docker and deployed on Hugging Face Spaces.

CERTIFICATIONS

- Certificate of Web Development - Simplilearn.
- NPTEL Certificate 2026.
